Vampire Penguin is a penguin who lives in the North Pole. And even though there are no other penguins in the North Pole, Vampire Penguin lives there because he is a vampire. His best friend is a walrus who has lead himself to believe that he is a vampire as well (because of his tusks). Even with the chosen life or darkness and isolation and behind Vampire Penguin's nonchalant eyes, he truly misses his family and longs to be with them, so he makes shaved snow to bring families and friends together.
